Hakuei Ren:

"While she's the first imperial princess of the Kou Empire, she's also the master of Paimon, the djinn of storms. What could be hidden in those eyes: a heart that longs for peace, or is it mad love...? Her favorite type is a strong man. The best dishes that she cooks are so awfully-tasting that they time and time again endangered the lives of her little brother and personal attendant."

Gyokuen Ren

"While she's the Kou Empire's empress dowager, she's also the leader of Althamen masked magicians; the strongest and the most dangerous black witch. The second emperor, Koutaku Ren, was suffering from illness and solitude, and by taking advantage of that Gyokuen turned him into her puppet. Going by her unnaturally youthful appearance, she and her real daughter, Hakuei, look like two peas in a pod."
